

## **DESIGNER, IMPLEMENTATION + MATERIALS** **CHUTE GERDEMAN, INC. | COLUMBUS, OH USA**

Working within the Implementation Studio, Implementation Designers transform brands into environments that wow consumers, systematically solving problems, adapting design elements to spaces, and constructing moments that allow creativity to prevail.

Implementation Designers are focused on effectively communicating the design intent to clients and consultants, utilizing renderings, design packages, or design intent drawing sets.

The responsibilities of Implementation Designers may vary by project. Specific activities may include design intent documentation and production support, collaboration with the Strategy & Innovation, Creative, and Implementation Studios, custom fixture production and documentation, and communication to third party architectural development and consultant teams.

The responsibilities of Implementation Designers also include material resource coordination, collaborating with creative studios to develop effective and innovative materials, furnishings, and fixture solutions for a diverse array of clients. Implementation Designers are responsible for initiating and supporting creative direction on material selection and specifications with team members of varying disciplines to demonstrate a variety of viable solutions. This requires presentation of material solutions to both project teams and clients.

### **REQUIREMENTS**

- 2+ years professional interior or architectural design experience.
- BA/BS in Architecture, Interior Design or related field of study, or equivalent work experience.
- Knowledge of construction documentation production, coordination, and conceptual detailing.
- Ability to translate conceptual design into working drawings.
- Ability to understand engineering documents for coordination purposes.
- Ability to complete redlines thoroughly (highlighting when complete), coordinating with Project Lead and Implementation team as necessary.
- Ability to clearly and effectively communicate with the Project Lead regarding task completion and/or project challenges as they arise.
- Familiarity of current trends and desire and ability to stay apprised and provide company-wide updates regarding new trends and applications.
- Experience producing material/finish submittal boards, both physical and digital.
- Experience creating and organizing project finish schedules.
- Experience coordinating and establishing new relationships with third-party vendors and ordering samples and maintaining the internal materials library.
- Knowledge of building codes, ADA, and construction specifications.
- Proficient in Revit modeling and documentation.
- Working knowledge of CAD.
- Familiarity with Adobe Creative Suite.
- Ability to manage time effectively to work within set parameters.
- Excellent communication skills, both written and verbal, with all levels of internal staff, as well as external clients, consultants and vendors.
- The desire and capacity to represent the company with character, ethics, enthusiasm, and professionalism.
